

## HSBC ETFs PLC

# HSBC NASDAQ Global Climate Tech UCITS ETF

Marketing communication | Monthly report 31 October 2025 | HNCS LN | USD (Acc)

## Investment objective

The Fund aims to track as closely as possible the returns of the NASDAQ CTA Global Climate Technology Index (the Index), while promoting environmental, social and/or governance (ESG) characteristics. The Fund will invest in, or gain exposure to, shares of companies which make up the Index. The Fund qualifies under Article 8 of SFDR.

## Investment strategy

The Index is a modified market-capitalisation index designed to measure the performance of a selection of companies in the global climate technology industry which are powering the transition to a carbon neutral global economy across equity markets worldwide, as determined by the Index Provider.

The companies are selected for inclusion in the Index based on classification by Consumer Technology Association (CTA). The Index is constructed by excluding companies: involved in the production of controversial weapons, tobacco production, thermal coal, and oil and gas.

The Fund is passively managed and aims to invest in the shares of the companies in generally the same proportion as in the Index.

The Fund may invest up to 10% of its assets in other funds and up to 10% of its assets in total return swaps and contracts for difference.

See the Prospectus for a full description of the investment objectives and derivative usage.

## Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI. The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating. For more information, see MSCI ESG Ratings Methodology @ <https://www.msci.com/esg-and-climate-methodologies>

Risk Disclosure

- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time (“tracking error”).
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

## Important Information

The fund is a sub-fund of HSBC ETFs plc ("the Company"), an investment company with variable capital and segregated liability between sub-funds, incorporated in Ireland as a public limited company, and is authorised by the Central Bank of Ireland. The company is constituted as an umbrella fund, with segregated liability between sub-funds. Shares purchased on the secondary market cannot usually be sold directly back to the Company. Investors must buy and sell shares on the secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current Net Asset Value per share when buying shares and may receive less than the current Net Asset Value per Share when selling them. Affiliated companies of HSBC Global Asset Management (UK) Limited may make markets in HSBC ETFs plc. UK based investors are advised they may not be afforded some of the protections conveyed by the Financial Services and Markets Act (2000), (the Act). The Company is recognised in the UK by the Financial Conduct Authority under section 264 of the Act. The shares in the company have not been and will not be offered for sale or sold in the United States of America, its territories or possessions and all areas subject to its jurisdiction, or to United States Persons. Investors and potential investors should read and note the risk warnings in the prospectus, relevant KID and Fund supplement (where available) and additionally, in the case of retail clients, the information contained in the supporting SID.
